

2023-2025 Sampling Plan: Lead in School Drinking Water

The Lead in School Drinking Water program is part of the state's efforts to reduce children's overall environmental lead exposure. Per requirements of [RCW 43.70.830 \(PDF\)](#) and [RCW 28A.210.410 \(PDF\)](#), all public schools built or with all plumbing replaced before 2016 must have all drinking water outlets tested for lead once between 2014 and 2026 and then every five years.

Options for sampling and testing

Schools have two options for sampling and testing the drinking water for potential lead contamination:

1. The Department of Health (DOH) will sample and test – at no cost to the school district, or
2. The district can contract for sampling and testing in alignment with the [DOH Lead in School Drinking Water Technical Guidance \(PDF\)](#). The district will then provide the results to DOH following procedure and deadlines determined by DOH.

Which schools will DOH test?

DOH worked with the Office of Superintendent of Public Instruction (OSPI) to identify schools needing to test water for lead. Every year, DOH will identify a group of schools from that list to include for testing. This plan will allow the schools, school community, and the public to know which schools are up for sampling and testing in the next two school years.

As required by [RCW 43.70.830 \(PDF\)](#), prior to adding a school to this plan, DOH must contact the school to determine whether the school has contracted, or is planning to contract, for sampling and testing. In some cases, schools listed on this plan may have conducted lead testing that has not yet been reviewed by DOH. Upon review of test results and protocols, these schools may be removed from this plan. Some facilities and buildings not yet listed on this plan may also be added upon inspection. DOH will continue to update the list below at least yearly as new schools are added and schools are tested. If you have questions as to the placement of a school on this list, please reach out to leadfreekids@doh.wa.gov.

Actions after testing

After testing occurs, DOH will share results with the schools. Schools have six months to adopt an action plan outlining steps they will take to remediate the outlets testing over 5 parts per billion. The school must provide the public with notice and the opportunity to comment on the school action plan before it is adopted. To learn more about the [requirements for school action plans](#), visit the [Lead in School Drinking Water Program FAQ](#) on our DOH webpage.
